Subject: Re: AN removal draft protocol

John:

Now I am really confused. Your earlier statement was that the AN would be removed before the inspection on June 3-4, but now you suggest the sampling/ removal of AN will take place afterwards. Our preference is that AN is removed after the inspection of June 3-4. That way we all have time to discuss and come to agreement on the protocol for taking the appropriate sampling of AN from the railcar.

Kindly confirm which will be the case as it weighs heavily in our needs to reach timely agreement on sampling.

Thank you.

My understanding is the AN will not be removed before the 4th. So that can be hammered out before it is removed. By the interested parties.

John:

I am having our experts review. The immediate questions that come to mind are: (1) whether 3 samples are sufficient, and (2) from where within the railcar the samples will be drawn.

Again, I am awaiting word back from our experts over the holiday weekend.

All,

Attached is the draft protocol for AN removal at the site.

I understand state and federal agencies want the removal to occur as soon as possible and before the inspection of June 3-4.

This protocol was put together in consultation with the AN manufacturer. A representative of the AN manufacturer was brought on site on Wednesday of last week to observe the rail car and its contents.

I would like to get approval for TCEQ on this plan or advise of changes.

I understand that the railroad, UP, is interested in removing the railcar once the AN is removed. They are on this e-mail and we ask they coordinate with Crane Engineering for this removal. It will require a protocol that is acceptable to the people on this e-mail.

When we have an approved plan to remove the AN and railcar we will pick a date to implement the plan. We plan to video that removal and share with all "interested parties".

We do not intend to have all "interested parties" attend the removal of the AN or the railcar.

John
